

## Mobile Office with Secure Windows

This was meant to be an April Fool's joke but I've decided to keep it running for a while ...

Hurry! Download your free copy of the pictures below entitled "Mobile Office with Secure Windows". Just right-click on the images and choose "Save link as ..." or "Save image as ..." then save the picture to your local drive.

Feel free to forward this to your friends (and even your enemies if you have some favorite ones). Just click [ [here](#) ] or on the "EMAIL" icon beside the title above and a window will pop up for you to forward the link to this page.

Cheers!
